

POWDER DIFFRACTION WITH VANTEC-1

- Large active area with simultaneous 12° 2θ coverage for
 - Fast continuous scanning or
 - Fixed- 2θ Snapshots
- Patented MikroGap technology for
 - Cr- up to Mo-radiation sensitivity
 - Radiation hardness, no degradation
 - 1600 channels for position detection
- Sealed tube proportional counter operation for
 - High dynamic range
 - Low detector noise
 - Good energy resolution
 - No maintenance
